

Ear nose and throat:

- Total ear canal ablation (TECA) and bulla osteotomy for management of chronic ear infections;
- Investigation of nasal cavities, rigid rhinoscopy and retroflexed rhinoscopy for biopsy;
- Brachycephalic airway syndrome
- Laryngeal paralysis, Tracheal rupture
- Maxillary/mandibular/palatine tumours
- Conditions of the salivary glands, sialadenectomy

Urogenital:

- Congenital & acquired urinary incontinence (ectopic ureters), prostatic disease and cryptorchidism
- Artificial urethral sphincters for treatment of sphincter incompetence
- Tumours and obstructive conditions of the urinary tract
- Treatment of obstructive ureteroliths with SUB (Subcutaneous Ureteral Bypass)
- Urethral stenting for management of urethral/bladder cancer

Oncological:

- Hard and soft tissue tumours (cancers): work-up with the support of our Imaging Specialist (Ultrasonography, Computed tomography and MRI scan) and surgical excision.

Gastrointestinal:

- Oesophageal strictures/foreign body removal using endoscopy (when possible) or surgery
- Intestinal tumours/obstruction
- Subtotal colectomy in feline megacolon, colorectal surgery
- Anal sac tumours, furunculosis

Wound management and reconstruction:

- Local/distant skin flaps and free skin grafting, major cavity-reconstruction;
- Management of non-healing and infected wounds using VAC device

Hepatobiliary system:

- Portosystemic shunts (abnormal blood vessels by-passing the liver), extrahepatic and intrahepatic;
- Hepatic tumours
- Biliary conditions (choleliths, mucocoeles, neoplasia)

Cardiothoracic:

- Congenital cardiac defects, pericardiectomy, atrial tumours, Patent ductus arteriosus
- Lung lobectomy, thymectomy, thymoma
- Migrating foreign bodies
- Pyothorax and chylothorax
- Palliative management of pleural effusions, pleural port, Denver shunt placement
- Tracheal stenting for treatment of tracheal collapse refractory to medical management

Endocrine surgery:

- Thyroidectomy and adrenalectomy

Hernia/rupture surgery:

- Perineal ruptures
- Diaphragmatic ruptures
- Pericardioperitoneal herniation
